

HELP YOUR CHILD LEARN

Learning is all about Vision:
80% of what a child learns in
school is presented visually.

Unfortunately, studies show that only 31% of children ages 6 – 16 have an annual eye examination, and 70% of children under have never had an eye exam.

As a result, 1 in 4 children will go back to school this year with an undiagnosed vision problem that could interfere with learning. Give your child the advantage that comes from good vision. Schedule a comprehensive eye examination in our office today.
